Tasks for independent work at home or for project days at schools

3.4. Learning about the painting trade

Lexicon of technical terms

In the film "Technical terms briefly explained" you can learn some of the vocabulary used in the painting trade. Watch it first and try to make the entries in the lexicon below. Surely you will be able to recognize in no time what has already been explained.

Also, find at least 10 terms that appeared in the other films or that you noticed in the task sheets or in texts or videos about the painting trade that you dealt with during the pre-internship. Are they ones that you might need not only in the painting trade, but in other contexts as well? That's exactly what this task is good for: you expand your vocabulary for other areas of life as well.

	Special Term	Explanation	Picture or symbol
A B		English term, refers to a device used to spray walls or things, paint is sprayed with the help of negative air pressure (so actually "without air").	
C D			
E F	Further education staircase
